

EXHIBIT 12

(part 3)

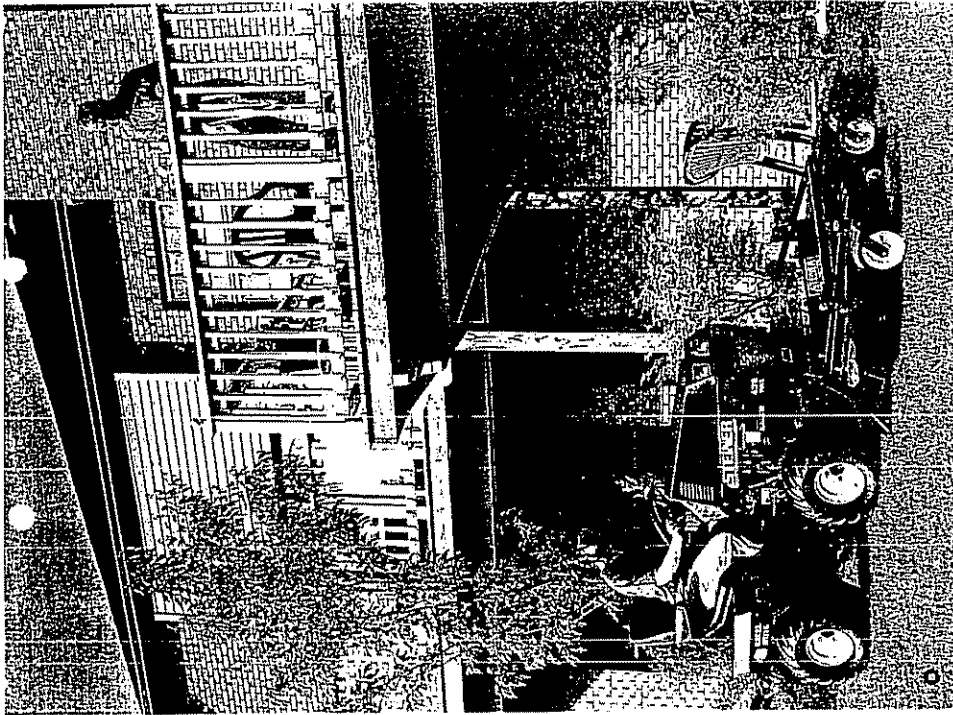

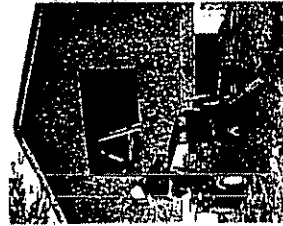

Power, versatility and comfort to the max.

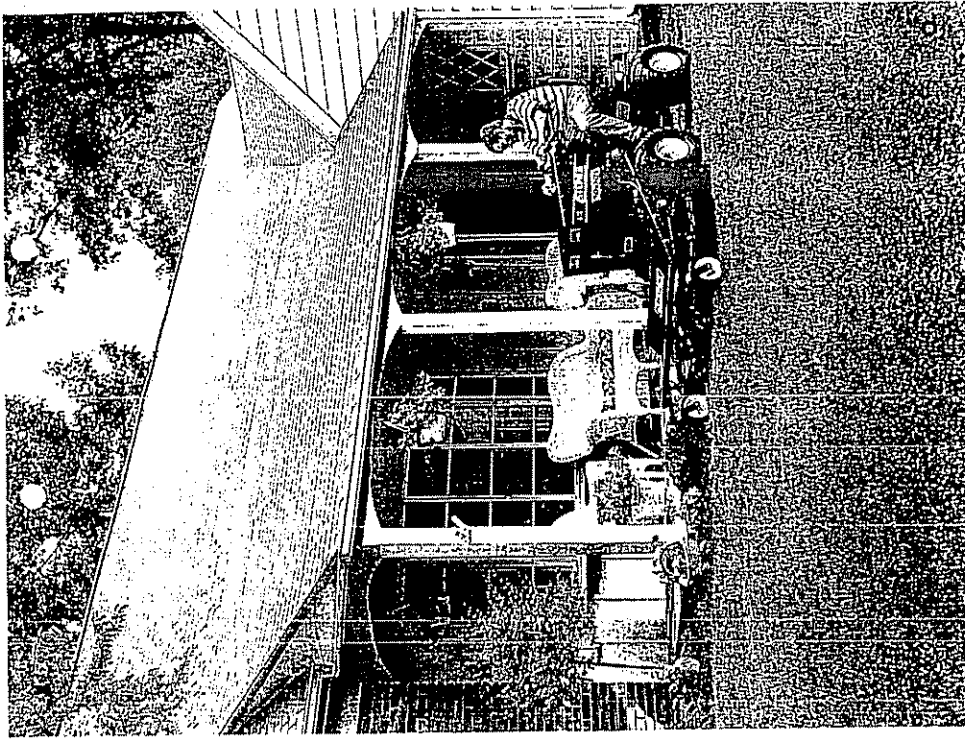

model 430

The Steiner 430 Max takes a good idea and makes it better. We begin with a strong foundation, including our constant 4-wheel drive, articulated frame, hydrostatic transmission and power steering. Then, we provide your choice of four engines capable of 20-25 hp. To keep you comfortably in command, you sit in an ergonomically

designed deluxe seat and use a new hydrostatic control that falls readily to hand. And Quick Hitch™ attachments and accessories are available to provide a wide range of capabilities.

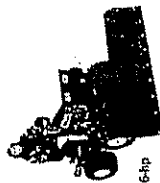

| ACCESSORIES |
|----------------------------|
| ROPE APPROPRIATE ROLL BAR |
| THREE POINT HITCH |
| WEIGHT BAG (FRONT OR REAR) |
| CAB |
| SUSPENSION SEAT |
| TURT TILES |
| DUAL WHEELS |

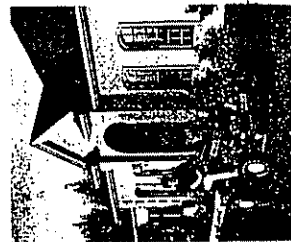

Simply designed to work harder for you.

model 410

The Sciner 410 takes many of the capabilities of our more powerful turf tractors and makes them available in a more affordable model. Powered by a 16-hp Onan Performer engine, the Sciner 410 offers the same advanced engineering that makes Sciner unique, including constant 4-wheel drive, an articulated frame and power steering. With your choice of Quick Hitch™ attachments, the Sciner 410 shares another characteristic of our larger models — it's highly adaptable at giving you more than you expect from a turf tractor.

| ACCESSORIES |
|-----------------------------|
| WEIGHT BAR |
| AUXILIARY HYDRAULIC CONTROL |
| BAR TIRE OPTION |
| TUFF TIRES STANDARD |

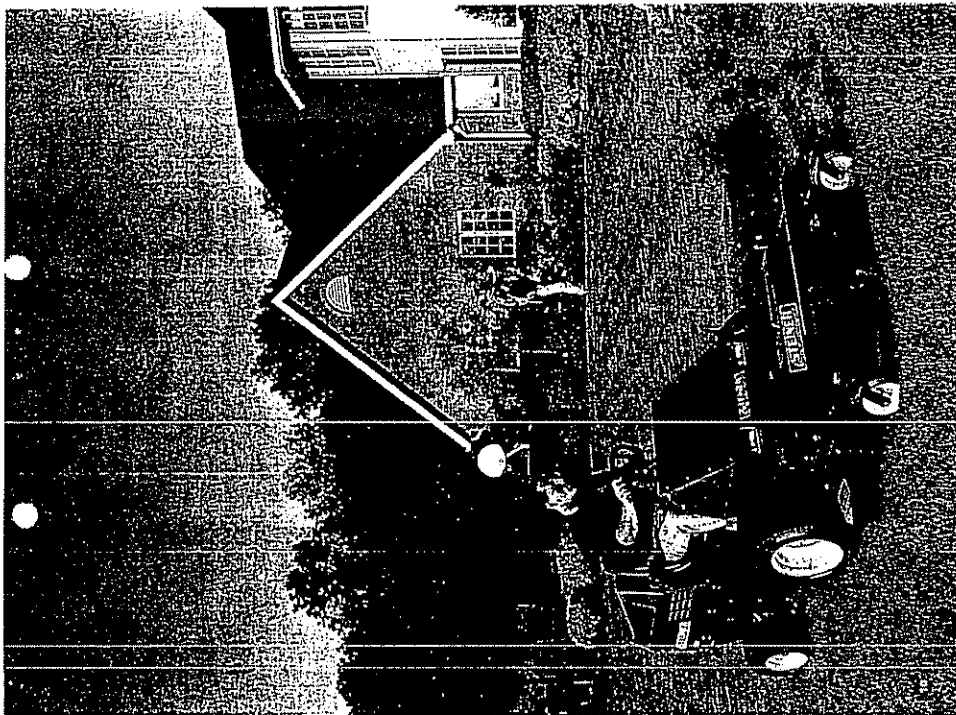

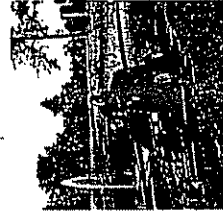

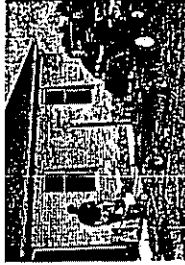

Get behind the power of a front-drive Steiner.

model 220

With front-wheel drive, the Steiner 220 offers superb performance, durability, traction and stability where conventional tractors fall short. Total control is yours with a foot pedal hydromast and rear power steering that enables the Steiner 220 to handle effortlessly around trees and other obstacles. Few turf tractors have a lower center of gravity than the 220, which positions you comfortably in the middle of the tractor for added stability. Best of all, our unique Quick Hitch™ attachments make it easy to get the job done with speed and precision.

A zero turning mower with zero deficiencies.

model 202

For those requiring a dedicated mowing machine, the Steiner 202 combines a zero turning radius with our passion for zero defects. Not only does it mow rings around other mowers, the Steiner 202 floats over uneven terrain with a unique mower deck that flexes as it goes for an even, clean cut. And no mower is easier to operate. Twin hydrostatic controls provide a steady ride, smooth power and easy handling — with minimal training — while a single park lever and cutting height handle allow for fast, easy adjustments. (Mulching adapter kit available.)

HR-5111TM 4WD Hydraulic Mower

The Professional's Choice on Turf

HR-5111: The All-Hydraulic

The HR-5111 delivers a productive 11-foot cut to rough, parks, and other large turf areas. Its three all-hydraulic mowing decks, four-wheel-drive (4WD) system, and comfortable operator station make the HR-5111 the right mower for your big job.

All-Hydraulic, High-Production Mowing
The HR-5111's revolutionary all-hydraulic rear discharge decks deliver a clean cut and full cut of any high-production, individual hydraulic mowers drive each blade for unmatched cutting power.

The floating deck design, with large castor wheels and anti-slip rollers, follows turf contours and reduces the risk of scalping. Cutting heights are adjustable from 1 to 5 1/2 inches. Spring washers on side deck mounting arms absorb impact. Mow with one, two, or all three decks, in match conditions.

The HR-5111's agile, compact design with hydrostatic transmission and rear-wheel power steering, maneuver freely around trees and obstacles. In open areas, the HR-5111 can up to 16 acres per day.

No Belts,
No Pulleys,
No Ridding

Individual hydraulic mowers power each of the HR-5111's three decks. Each deck is driven without the hassle of belts, pulleys, idlers, deck lids, or PTO shafts. Belts make no sense on a deck designed for even clippings dispersal.

4-Wheel-Drive Traction

Hydraulic 4WD with a differential lock, handles tough hills that make it difficult to mow. A hydraulic weight-transfer system shifts the weight of the deck to the wheels for full traction. Unlike mechanical 4WD, hydraulic 4WD rotates each wheel at the correct speed during turns, to prevent turf scalping and provide full traction.

Built For Trouble-Free Operation

The HR-5111 spends its time working. All-hydraulic decks mean no belts, deck lids, blade pulleys and idlers to fit. Each motor has self-lubricating spindles for less maintenance.

The wing decks tilt vertically when raised, and the front deck lifts vertically by removing two pins at the rear of the

deck, for easy cleaning and servicing. Hydraulic ports make it easy to check hydraulic pressures.

Economical Diesel Power
The HR-5111 is powered by a reliable, efficient, 51-horsepower, liquid-cooled, diesel engine. The engine is fully protected by a hood and isolation mounted for cleaner, quieter operation. A top-mounted, heavy-duty air cleaner protects the engine from harmful dust and clippings.

The hood tilts up and back for full access to the engine. The hydraulic oil cooler slides away from the radiator for cleaning. The HR-5111's durable fiberglass body keeps its good looks, even in harsh conditions.

■ Adjustable seat, cruise control, tilting when for operator comfort.

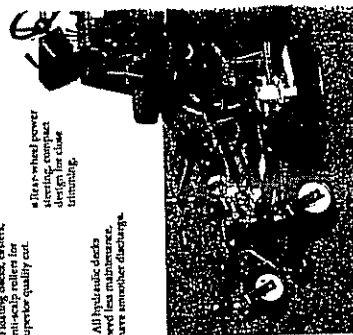

■ Hydraulic 4WD for sure traction without fuel dilution.

■ Ergonomic design puts operator in command at every turn, right.

■ Floating decks, casters, anti-slip rollers for superior quality cut.

■ Rear-wheel power steering, compact steering, compact steering, compact steering.

■ All hydraulic decks have immediate discharge.

WWD High Production Rotary

The box charcoal steel frame and heavy-duty axle can handle years of mowing. And it's backed by a two-year/1,500-hour warranty.**

Built For Operator Comfort

Your operators will like the HR-5111's comfortable high-back seat, cruise control and tilt steering wheel. Good visibility and ergonomic controls keep them productive without strain. A full array of gauges and warning lights keep operators aware of vital mower functions. For extra protection, a horn sounds if engine coolant or hydraulic oil begin to overheat.

A ROPS and seat belt are standard on the HR-511L. A canopy with lights and flashers, or a factory-installed cab with windshield wiper and heater are also available.

- 
- Diapronic ports to check hydraulic pressures.
 - Fiberglass body keeps its good looks longer.
 - ROPS, seat belt standard, canopy with lights or factory-installed cab with windshield wiper and heater are available.
 - Fuel efficient, powerful 31 hp diesel engine.

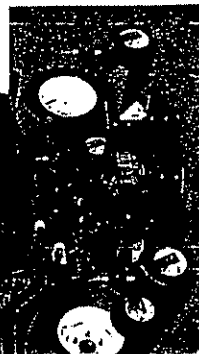

The HR-511 features dynamic braking, along with heavy-duty, hydraulic disc brakes on the drive wheels for sure stopping.

For year-round versatility, a 62-inch snow thrower and 72-inch rotary brush are also available.

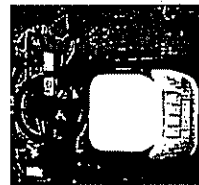

For quality, high-production mowing, versatility, and operator comfort, in a reliable package, call your Jacobsen dealer today for a demonstration of the HIR-5111.

*Consult your owner's manual for safe operation on slopes.
